Introduction

TosoOS is a multi-boot OS for the Sega Dreamcast/NTSC modding by Toso-Toso. Either providing all the features of DreamOS, it also provides a host of innovative new features such as the ability to boot from a CD-R/W.

TosoOS v5.4 Features:

- Integrated Chain device action, when you run an application from the CD-R/W it will boot the DreamOS
- Integrated Chain device action from the device all connected to the Dreamcast (Such as the Addition of the Zeon Flasher Flash device. This allows you to copy an GD-R/ ZIP or your VMU to the Zeon Flasher Flash device, and then boot the application from the device, without holding the A button during the boot process.
- Integrated Chain device action from the TosoOS Flash Cartridge (Version 2 or Higher)
- Continue the Intrusion has been added and is used in several places in new files, to provide a more stable system, and to allow the Dreamcast to be used as a Stereoscopic Out device, and to allow the Dreamcast to be used as a Stereoscopic Out device with the Flash Cartridge.
- Stereoscopic Out Support has been added to the Flash Cartridge.
- Controlpanels fixing for playing games for the NTSC have been included. Games such as Sega GT, Sega Bass Fishing, Sega Rally 2 etc.
- Dev-switch Flash Mode has been added to the Flash Cartridge.
- Dev-switch Flash Mode has been added to the Flash Cartridge.
- Many other miscellaneous changes and fixes.

The TosoOS v5.4 Release is the first release of the TosoOS version we have decided to boot up the Dreamcast from the Flash Cartridge device and provide and PCI/ PCIX device installed in the Dreamcast, instead of a CD-R/W.

TosoOS Feature list

OS features:

- Boot Flash Cartridge device from v_DE_1000. This feature is decreased loading times and provides a more stable system, as the Flash Cartridge is faster than the CD-R/W, and more perfect, does loading times!
- Integrated Chain device action, which is automatically similar to Action Replay. Supports the use of Zeon Flasher and Flash Cartridge devices.
- Integrated Chain device action, which allows you to boot from the Flash Cartridge device, and also can save changes devices.
- Boot Flash Cartridge device, which allows you to boot from the Flash Cartridge device if the CD-R/W Drive has not been installed, or if the CD-R/W Drive has been disabled.
- Boot standard discs (PC, PSX, Sega Saturn) from TosoOS Cd you don't need to boot DreamOS, or use the Flash Cartridge to boot.
- Boot standard discs (PC, PSX, Sega Saturn) from the Flash Cartridge.
- Boot standard discs (PC, PSX, Sega Saturn) from the Flash Cartridge.
- Many other miscellaneous changes and fixes.

The TosoOS v5.4 Release is the first release of the TosoOS version we have decided to boot up the Dreamcast from the Flash Cartridge device and provide and PCI/ PCIX device installed in the Dreamcast, instead of a CD-R/W.
